nintex
the possibility engine

Nintex Automation K2

Unlock possibilities and accelerate your innovation journey with Nintex. Powerful applications customized to fit your needs, together with workflow that connects your people, systems, and processes. Orchestrate how and when work gets done, in an environment you fully control.

Optimizing all business functions becomes imperative as organizations move toward an increasingly customer-obsessed operating model.

For application development teams, this means making underlying systems and processes accessible to non-technical teams, enabling them to gain insights and respond to customer needs faster.

Nintex Automation K2 enables teams to build apps that drive success by combining the power of business users and IT collaboration.

Automate workflows using Nintex's drag-and-drop designer without code. Nintex Automation K2 connects to virtually any business system, allowing departments to scale workflows efficiently.

For organizations with strict data privacy, governance, and compliance needs, Nintex Automation K2 provides powerful on-premise and self-hosted options. Gain advanced orchestration, control, and scalability while meeting strict regulations as you scale.

Nintex Automation K2 customers see incredible business impact, including:

30%
reduction in processing and managment time, allowing faster responses to changing demands from project teams and operations.

4× faster
production of sales documents and generation of quotes in hours instead of days with streamlined quote-to-case workflows.

30%
faster app development using a rapid development environment powered by low-code.

Power up possibility: Common use cases

Put automation to work for your team so you can spend more time collaborating, building, and focusing on the work that really matters. No matter which department or industry you're in, Nintex has you covered.

Customer success story
Proliant achieves massive growth through streamlined sales processes

SITUATION
Proliant's existing technology stack consisted of complex and hard-to-maintain solutions. The company knew it needed to find new technology solutions for more efficient and flexible development.

SOLUTION
As part of its strategic digital transformation, Proliant sought a digital process automation (DPA) solution to meet its sales process objectives and simplify its process automation.

Focusing on three main objectives—cross-functional efficiency, customer journey reporting, and integration capabilities—Proliant evaluated Nintex Automation K2 against a competitor platform and ultimately chose K2.

RESULTS
With Nintex Automation K2's digital process automation, Proliant can scale and manage business more efficiently. Proliant has plans to implement this leaner approach with the Operations and Implementation teams to simplify processes across the organization.
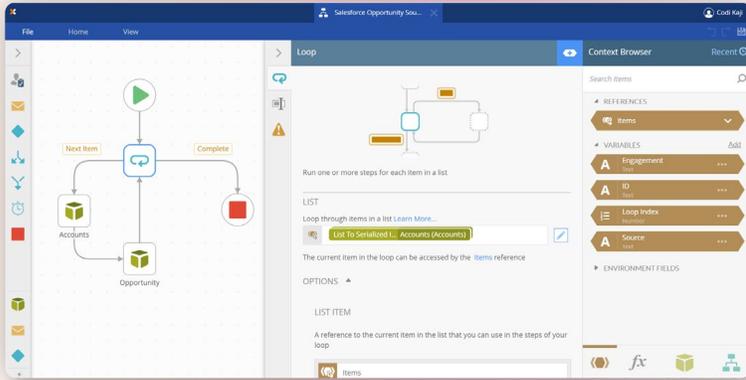

> "
> [Nintex Automation] K2 really filled the gap…We can automate repetitive tasks, freeing up seasoned and new employees to focus on higher-impact work. This will really help us move the company to the next level.

Product capabilities
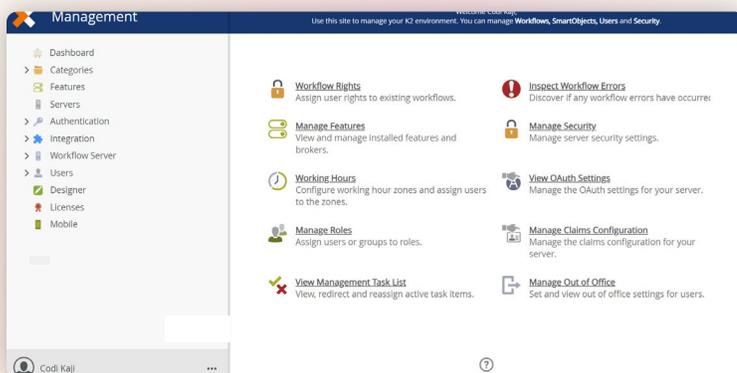

Build workflow apps faster

Nintex Automation K2 allows you to turn your great ideas into powerful enterprise apps. K2 enables users to build and deploy custom apps faster than ever before.

According to Forrester's Total Economic Impact report on the Nintex Automation K2 platform, our customers enjoy a reduction in development time by up to 78%. Our simple, drag-and-drop design functionality, customizable templates, and app-creation wizard get you started quickly—no matter how complex your requirements.

With Nintex Automation K2, you can:

- → Create powerful web and mobile apps with minimal code
- → Integrate with virtually any business system with a simple point-and-click interface
- → Easily develop for all devices and form factors, including mobile

- → Create components like forms, workflows, and connectors once and reuse across all the apps in your organization
- → Easily incorporate business rules and logic
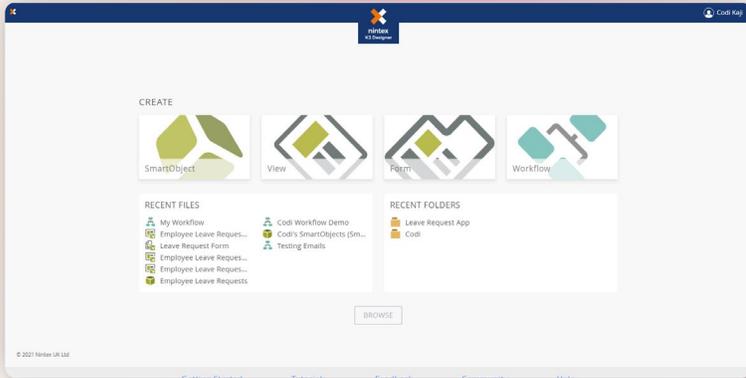

Empower your people

With Nintex Automation K2, business users can create powerful, custom enterprise apps without waiting for IT, empowering teams to innovate and solve critical problems while freeing development resources to focus on higher-value challenges.

Nintex Automation K2 customers can:

- → Turn disparate sources of data into actionable insight by creating powerful, custom apps
- → Streamline IT environments and cut costs by eliminating the need for expensive single-use apps
- → Maximize productivity and value of dedicated developer teams by extending self-service capabilities to business users

- → Empower teams to address their workflow challenges with a user-friendly interface
- → Enable users to create custom reports and analytics quickly, without IT intervention

Product capabilities

Take control of your apps

Inefficient business processes and poor governance practices can slow down your organization and increase risks. With Nintex Automation K2, IT can unify and streamline work across your enterprise while maintaining control over users and data. Organizations including Nordstrom, Guy's and St. Thomas', and First West Credit Union use K2 to build apps that improve efficiency, minimize risk, and offer great customer experiences.

Nintex Automation K2 provides:

→ A powerful platform capable of handling a full range of processes

→ Endless scalability built on 20+ years of process expertise

→ Rapid deployment across your enterprise or hosted as a private cloud

→ Centralized management providing better visibility and governance across all your apps

→ Connection with third-party AI solutions

→ Role-based permissions for easy setup and management of user and app access

The Nintex difference

Pricing 🏷

Nintex subscription pricing is transparent and predictable. With several starter packs and the ability to add users, Nintex offers tiered packages to meet any budget, large or small.

Support ⊚

Nintex is there for you along your automation journey. Our global, world-class support teams will ensure you get the help you need, when you need it. 8×5, 24×5, and 24×7 support packages available.

Services ⌖

Nintex has automated processes since 2006. Whether you need assistance with planning, implementation, or maintenance, our experienced professional services team can help you achieve your automation goals in the shortest time possible.

Partners 👤

Access over 700 Nintex implementation partners globally that can make your automation vision a reality. With partners who specialize in specific technologies, use cases, and verticals, there's bound to be a partner that's just right for you.

Solutions ⊞

Accelerate time to value and ROI with starter templates and pre-configured solution frameworks for use cases like case management.

At Nintex, we believe intelligent automation can remove friction from work and inspire teams to build a culture of efficiency that accelerates business success.
